

Azure VMware Solution

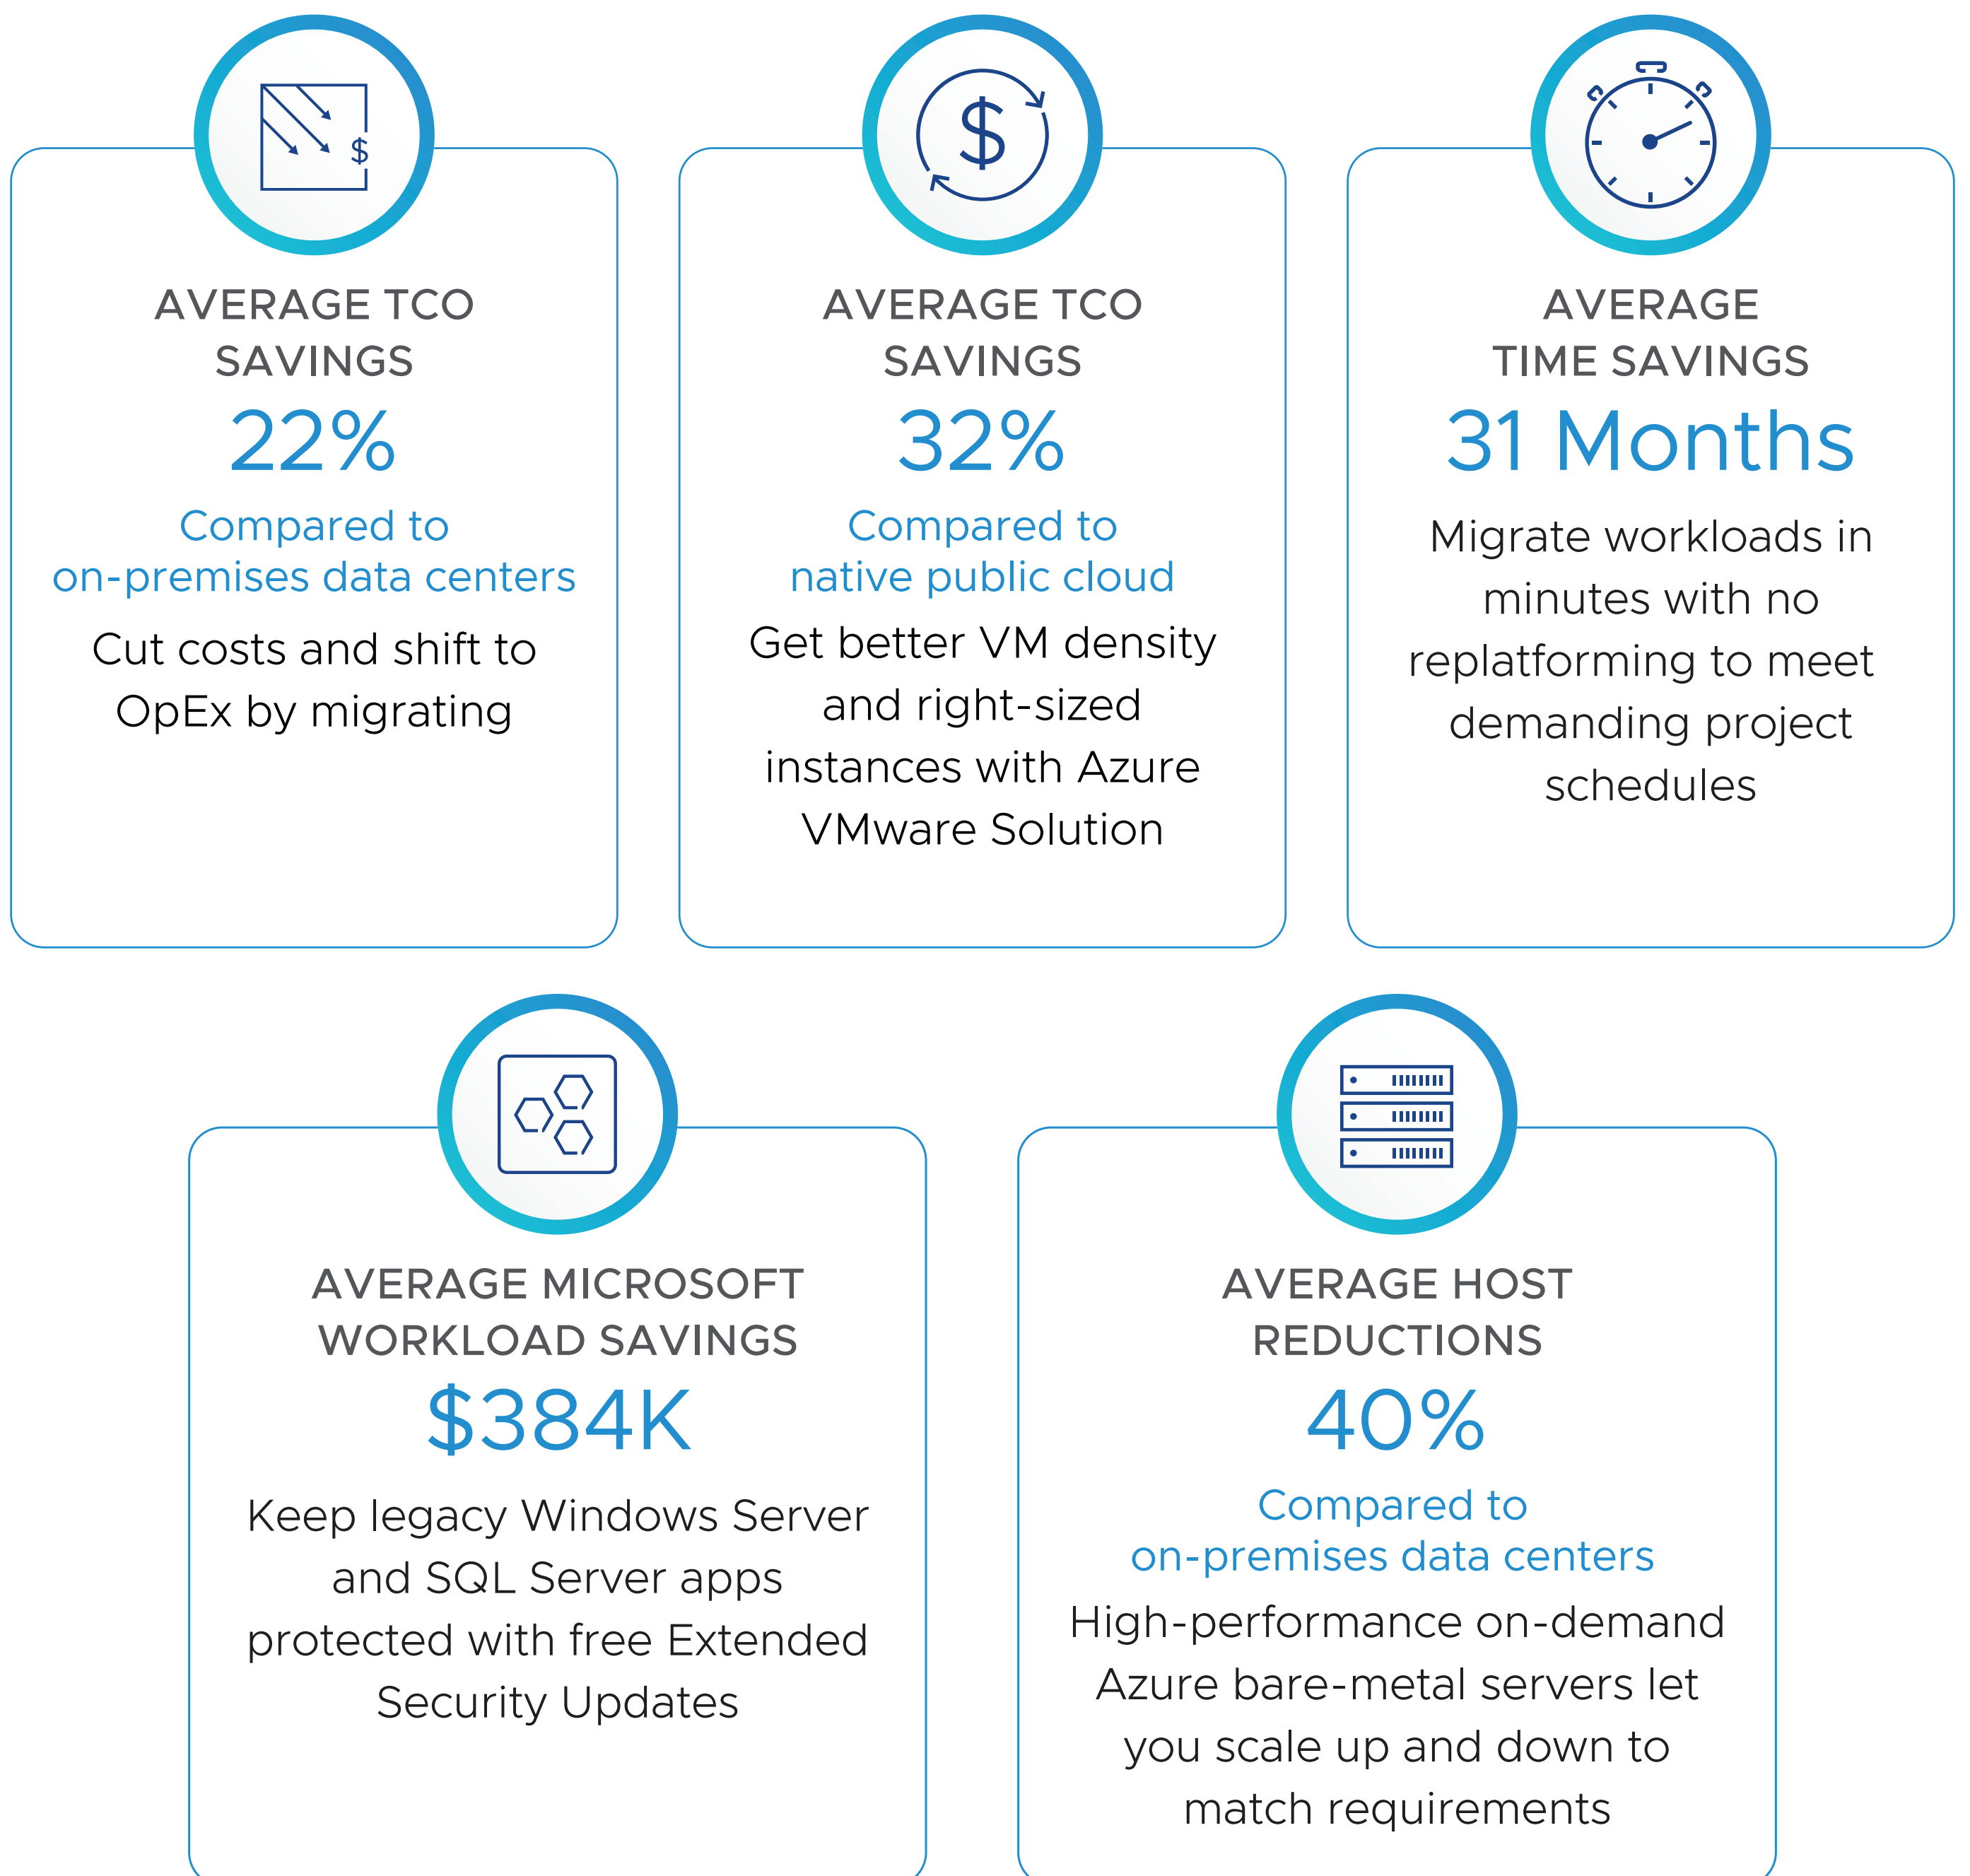

The most cost-effective cloud destination for Microsoft workloads

Accelerate cloud migration and modernize applications at your pace with Azure VMware Solution.

Run VMware as a native Azure service and capitalize on your existing VMware investments, skills, and tools. Maintain operational consistency while leveraging the scale, performance, and innovation of Azure. Keep costs low with exclusive Azure savings for Microsoft workloads.

Fast, affordable, and simple cloud migrations with Azure VMware Solution

VMware as a native Azure service, built and operated by Microsoft, verified by VMware

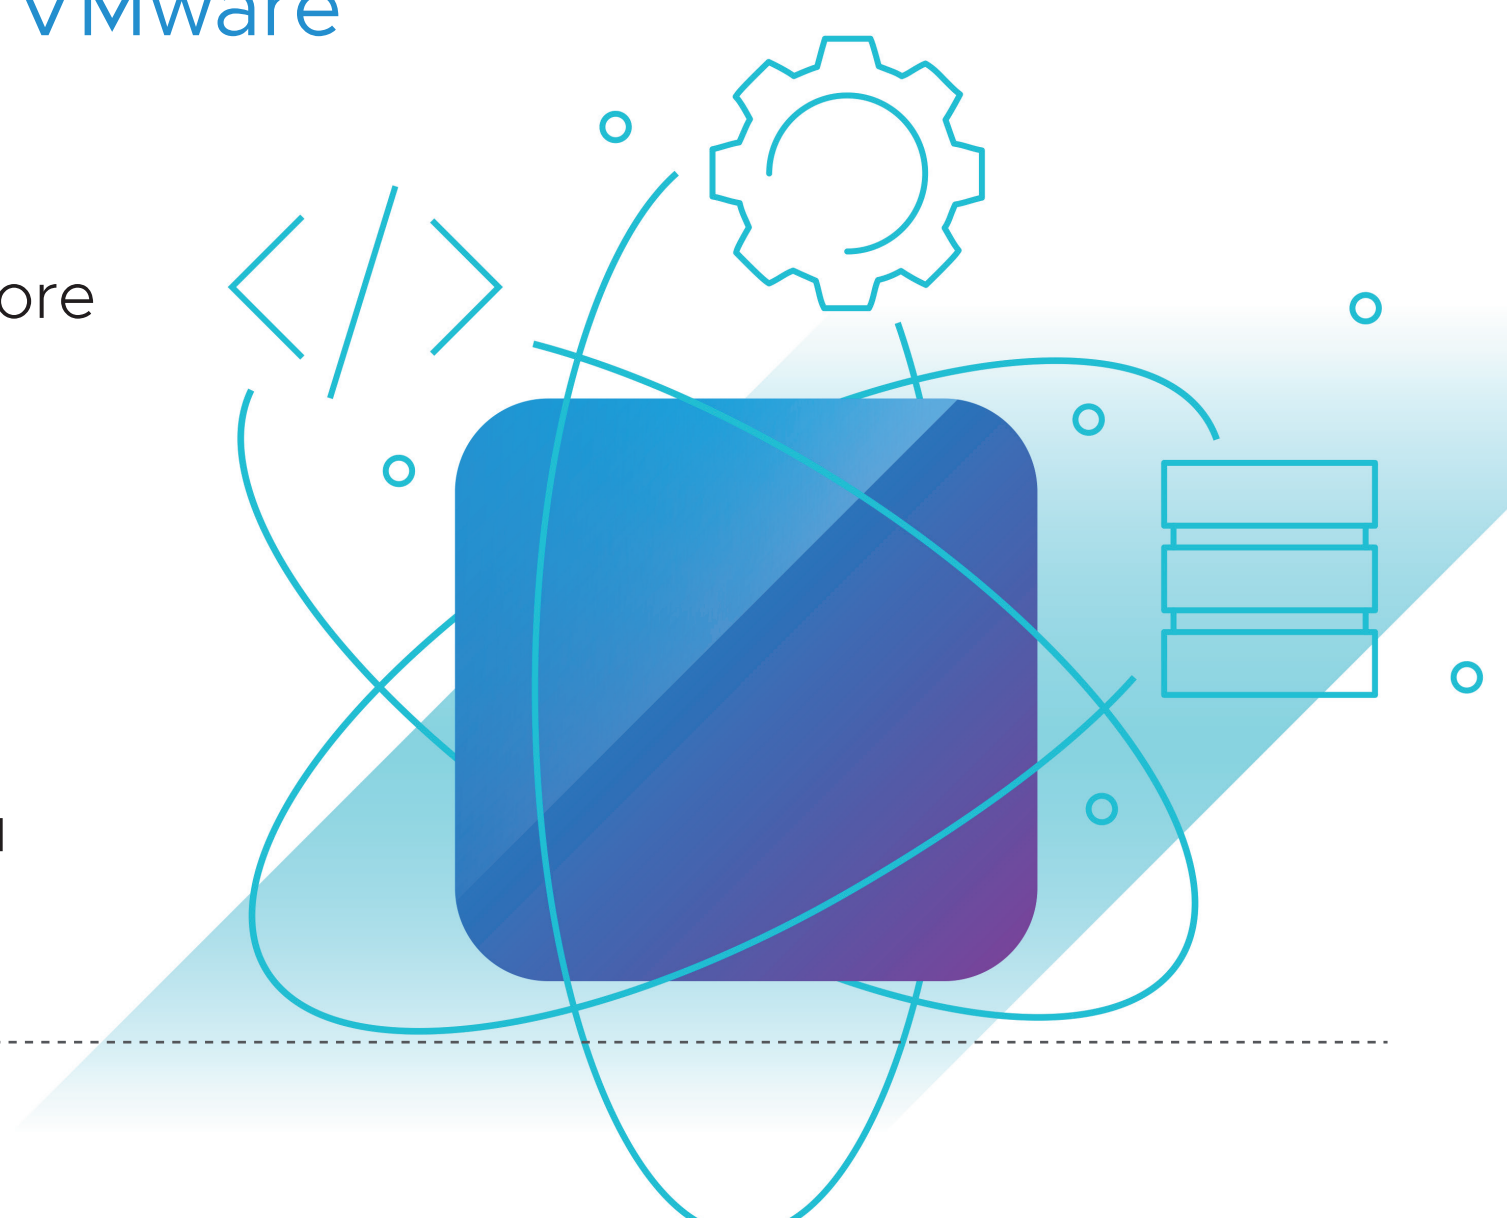

Quickly deploy a VMware environment on bare-metal Azure hardware and rapidly move your workloads to the Azure cloud with bulk and live migration, requiring no replatforming.

- Keep cloud migration projects on schedule and within budget**
No replatforming needed; migrate apps in minutes vs. weeks with HCX
- Preserve investments in skills and operational processes**
Use familiar vSphere Client, vCenter, and vRealize tools with no need to retrain IT staff; scripting and automation work with no changes
- Replace dedicated DR facilities**
Use VMware Site Recovery Manager or other DR tools to recover critical workloads; scale up Azure VMware Solution quickly to handle large failovers
- Exclusive Azure savings apply to Azure VMware Solution**
Use your existing Windows Server and SQL Server licenses with Azure Hybrid Benefit; keep legacy Windows Server and SQL Server apps protected with free Extended Security Updates; pay using your Azure credits
- Workload sizing and density flexibility with vSphere**
Size VMs more precisely and push memory and CPU harder than possible with native cloud instances
- Let Microsoft manage and support your infrastructure**
Azure takes care of all upgrades and patches, and provides first-level support

Azure VMware Solution: The Best of Azure and VMware

Run, manage, and modernize your vSphere-based apps in the Azure cloud with access to a broad range of native Azure services.

- Azure is the best cloud destination for your Windows workloads**
Exclusive license savings and extended support policies
- Build powerful solutions with VMware attached services**
VMware Horizon, vRealize, SD-WAN, NSX Advanced Load Balancer, and more
- Modernize at your pace**
Quickly and easily migrate your apps, then enhance them with hundreds of native Azure services, or deploy new cloud-native apps with VMware Tanzu
