VMware Workspace ONE Editions

VMware Workspace ONE® is an intelligence-driven digital workspace platform that provides a multi-platform endpoint management to deliver and manage any app on any device simply and securely. Workspace ONE Standard, Advanced and Enterprise are available as both a cloud service or on-premises, while our new Essentials packages are only available as a cloud service. For more details on what's included in these editions, please speak with your VMware representative, or contact us here.

Workspace ONE Editions Comparison		Employee Essentials	Mobile Essentials	Desktop Essentials	Unified Endpoint Management Essentials	Standard Edition	Advanced Edition	Enterprise Edition[1]
Workspace ONE Intelligent Hub	Employee-facing app that delivers: Unified App Catalog, People Search, Notifications, Self-Service Support, Branding and a Custom Home Tab. Available as a native app on Windows, macOS, iOS, Android, and available as a web app, Intelligent Hub for Web.	●	●	●	●	●	●	●
Workspace ONE Access[2]	Integrate with upstream identity providers and directories, including Active Directory, Azure Active Directory, LDAP, Okta and Ping. Federated and Mobile SSO, MFA, Conditional Access Control.	●[2]	●	●[2]	●	●	●	●
Workspace ONE Tunnel	Connect apps (VMware or third-party) to corporate intranet services with per-app VPN client app. Requires server-side per-app VPN infrastructure, such as VMware Unified Access Gateway or VMware Secure Access.	●	●	●	●		●	●
Secure Email Gateway (SEG)	Provide access control to the work email server to encrypt data and attachments.	●	●	●	●	●	●	●
Mobile Productivity Apps	Workspace ONE Boxer, Content, Web, Notebook, Send, PIV-D Manager, and Workspace ONE SDK with DLP.	●	●	●[3]	●	●	●	●

Workspace ONE Editions Comparison		Employee Essentials	Mobile Essentials	Desktop Essentials	Unified Endpoint Management Essentials	Standard Edition	Advanced Edition	Enterprise Edition[1]
App wrapping	Add security policies and management capabilities into an app that is already developed.	●	●		●		●	●
Mobile Device Management	Configure mobile device management (MDM) policies and profiles, mobile app management (MAM), mobile email management, basic shared device, and Android OEM extension settings across phones, tablets and laptop devices.		●		●	●	●	●
Frontline Worker Add-on (advanced mission-critical device management)	Deliver advanced management for corporate-owned, shared, mission-critical endpoints (e.g., rugged handheld mobile computers, tablets, smartphones, wearables, and more). Includes support for Workspace ONE Rugged Enrollment Configuration Wizard and Android device management with Workspace ONE Launcher™.		Add-on	Add-on	Add-on	●	●	●
Modern desktop management	Deliver MDM API-driven modern management of desktop operating systems. Best suited for kiosk/locked-down use cases only. Includes out-of-the-box device onboarding (OOBE, DEP).		●[4]	●	●	●	●	●
Advanced desktop management	Deliver advanced desktop management capabilities for Windows 10 and 11, macOS, Chrome OS and Linux beyond what is available through MDM APIs.			●	●		●	●
Enterprise desktop management	Deliver enterprise-level desktop management capabilities powered by Workspace ONE Intelligence™. Includes dashboards, reports, and automations within the Workspace ONE platform to support use cases such as OS updates and patch rollout, CVE- and sensor-based vulnerability remediation, and others.			●[5]	●[5]			●[1]
Reports	Custom point in time reports with device, application, and user data are available via Workspace ONE Intelligence.	●	●	●	●	●	●	●

Freestyle Orchestrator	Design and orchestrate IT workflows that consist of sequential steps using a modern, low-code, canvas-based UI.		●[6]	●[6]	●[6]	●[6]	●[6]	●[6]
Workflows across third-party apps	Workflow automation with pre-defined rules; integrate with third-party tools that support REST APIs, powered by Workspace ONE Intelligence. Integrate with third-party tools to expand workflows across your IT ecosystem.	Add-on	Add-on	Add-on	Add-on	Add-on	Add-on	●[1]
Workspace ONE Mobile Threat Defense	Protect mobile devices from phishing and application, device, and rogue network originated threats. Powered by Lookout, VMware mobile device security integrates with Workspace ONE.		Add-on		Add-on	Add-on	Add-on	Add-on
Workspace ONE Assist for remote support	Enable IT and help desk staff to quickly assist employees with remote view and control capabilities; supports Android, iOS, Windows CE, Windows Mobile, Windows 10 and 11, macOS and Linux devices.	Add-on	Add-on	Add-on	Add-on	Add-on	Add-on	Add-on
Workspace ONE Experience Analytics	Digital Employee Experience Management (DEEM): Track digital workspace metrics impacting employee experience. Proactively identify issues; perform root cause analysis; and quickly remediate. Includes historical reports, dashboards and integrations with third-party apps.	Add-on	Add-on	Add-on	Add-on			●[1]
Workspace ONE Risk Analytics	Device and user risk scores based on device context and user behavior. Risk scores are calculated leveraging machine learning models. Utilize for risk-based conditional access. Includes historical reports, dashboards and integrations with third-party apps.	Add-on	Add-on	Add-on	Add-on			●[1]
Workspace ONE Intelligence	Experience analytics, Risk Analytics, historical reports, dashboards and integrations with third-party apps.					Add-on	Add-on	●

Workspace ONE Editions Comparison		Employee Essentials	Mobile Essentials	Desktop Essentials	Unified Endpoint Management Essentials	Standard Edition	Advanced Edition	Enterprise Edition[1]
Workspace ONE Trust Network[7, 8]	Leverage investment in security tools by ingesting data from security partners into Workspace ONE Intelligence and gain deeper visibility into the security posture in context to your environment.	Add-on	Add-on	Add-on	Add-on	Add-on	Add-on	●[1]
Virtual apps (Horizon Apps Universal license)	Simplify the management and delivery of virtual apps on-premises, in the cloud, or in a hybrid or multi-cloud configuration through a single platform to end users.	Add-on	Add-on	Add-on	Add-on	Add-on	Add-on	●
License entitlements								
Default app storage space	Utilize the default app storage space. Additional storage may be purchased at 25GB increments; SaaS only.	25GB	25GB	500GB	500GB	25GB	500GB	500GB
Number of licensed devices	Maximum number of devices allowed under management or SDK app managed.	Per-Device License: 1 Per-User License: 5						

For more information on Workspace ONE, please visit vmware.com/products/workspace-one.

1. Workspace ONE Intelligence (dashboards, automation, DEEM, Risk Analytics, etc.) is not included in Workspace ONE Enterprise perpetual on-premises licensing. Workspace ONE Enterprise Perpetual on-premises customers must purchase Workspace ONE Intelligence as an add-on, which is available as a cloud service only.

2. Mobile SSO is not available with Workspace ONE Employee Essentials or Desktop Essentials. When licensing Workspace ONE in a device-license model, the SSO, MFA and access control technologies are restricted to only work on licensed devices and from managed apps. Organizations looking to enable access to enterprise apps across devices not licensed for Workspace ONE or allowing access to enterprise apps from any web browser must license Workspace ONE in a per-user license model.

3. Desktop Essentials customers can download the mobile productivity apps at no additional cost, but Desktop Essentials does not include mobile management features required to secure and manage these apps. For these features, consider Employee Essentials, Mobile Essentials, or UEM Essentials.

4. Workspace ONE Mobile Essentials only supports limited modern desktop management profiles (MDM) for tablet/kiosk use cases (i.e., S Mode/RTM/IoT). Advanced agent-driven PC management capabilities for desktop PCs are not included.

5. Workspace ONE Employee Essentials, Mobile Essentials, Desktop Essentials and UEM Essentials include limited Workspace ONE Intelligence features such as snapshot reports and dashboards, as well as UEM platform only automation. Workspace ONE Employee Essentials, Mobile Essentials, Desktop Essentials and UEM Essentials do not include full Workspace ONE Intelligence capabilities, such as reporting and dashboards with historical data, automations with third-party integrations through custom connectors, Risk Analytics, Digital Employee Experience Management, and Workspace ONE Trust Network.

6. Workflows across Workspace ONE UEM only, for platform, OS and features supported by the specific Workspace ONE UEM SKU.

7. Experience Analytics and Risk Analytics add-ons are available only for customers of Workspace ONE Essential offerings. For Workspace ONE Standard and Advanced customers, Experience Analytics and Risk Analytics capabilities are available as part of the Workspace ONE Intelligence add-on. Workspace ONE Trust Network is available with Workspace ONE Intelligence or Workspace ONE Risk Analytics.

8. Workspace ONE UEM supports legacy MTD integrations using open APIs where independent software vendors (ISVs) have built their apps to leverage these APIs. This is achievable across all editions that include UEM and does not require Workspace ONE Trust Network.
